The vision of making a dream become reality is evidenced in the practice of master planning. At the start of the project our senior project managers commit to learning everything regarding the project. Using a tried and true method of design, our land planners are able to simplify, clarify, streamline and ultimately save our clients time and money.

Frenchman's Reserve by Toll Brothers, Inc., Palm Beach Gardens

We have a well developed understanding of the process. From environmental factors to traffic issues and neighborhood relationships, Land Design South has a solid understanding of what works in Florida. From this basis, we are able to launch into the creative design process, producing a master plan that our clients can be proud of. When asked by county experts to serve on planning committees for code development, we have been proud to serve. We act not only as an agent between clients and the government planner, but also as a team builder for a region that we also work and live within. We are proud that we have had the opportunity to assist in the design of significant communities within the Florida region that the state and county alike regard as successful, beautiful areas of managed growth.
