- Broward Regional Service Center, Broward County

One of the key identifiable features of a region or community are the cultural facilities and museums located within an area. As a community grows, people choose to spend leisure time collectively at festivals, amphitheatres, parks and convention facilities. Each of these facilities contribute to the overall depth of the community, offering education and leisure opportunities while establishing the flavor of the area.

The development of the Palm Beach County Convention Center was a dream come true for the entire county and the City of West Palm Beach as a generator of cultural events in the area. Land Design South was honored to be selected as part of the design team under Schwab, Twitty, Hanser Architects. Sited directly across from the Kravis Center, the new Palm Beach County Convention Center has proven to be a catalyst for downtown growth. Land Design South was selected to complete the landscape architecture for the project including the hardscape, walkways and planters. Our team of professionals considered the overall architecture of the building, its close proximity to City Place and The Kravis Center and the entire placement of the accent plantings and pedestrian areas. The Palm Beach County Convention Center has been considered one of the finest new buildings in the renaissance of West Palm Beach.
